

# BOWDEN FENCE

*Our Top 10 Projects for Year 2025*

## FENCING HIGHLIGHTS

*Thank you to our customers and partners for making 2025 an exceptional year! Your trust and support mean everything to us, and we look forward to continuing our work together in 2026.*

## 10. STONEMONT CASTING PARK

*In partnership with **Alston Construction**, we installed a secure and efficient perimeter solution: an 8' High, Montage Invincible Steel Fence and two 1HP HSLG slide gate operators to fully automate the new entry gate system.*

*Built for durability, safety, and long-term performance.*

## 9. FABCON

Installation of 354 linear feet of 6' tall No Climb WireWorx fencing reinforced with three rows of barbed wire, built to secure **FabCon's** assets & operational safety measures.

The scope also included two 44' custom built bi-parting cantilever gates, providing smooth, reliable access control with a durable, high-security finish.

## 8. ADVENTURE PARK PICKLEBALL COURTS

Together with **M&D Black Top**, we installed 840 linear feet of 10' black vinyl-coated chain link fencing and 320 linear feet of 42" fencing to enclose the Adventure Park Pickleball Court in **Powell, Ohio**. The result is a durable, low-maintenance solution built for safety and functionality.

We take pride in seeing these courts so active!

## 7. TRUE POINTE DUMPSTER ENCLOSURE

In partnership with **CLMS**, alongside **ECS Development**, we provided dumpster enclosures for the current development of **True Pointe Development** in Hilliard, Ohio.

These dumpster enclosures were built with durability in mind using Composite Decking Boards and heavy duty hinges, with all dumpster gates hanging on 6-5/8" Galvanized Steel Posts.

## 6. KRUMM PARK PICKLEBALL COURTS

At Krumm Park, we collaborated with **Strawser Paving Company** to deliver a comprehensive installation package for this **City of Columbus Park**, including 354 linear feet of 8-foot black chain link fencing, 88 linear feet of 4-foot black chain link fencing, pickleball nets, and a Steelworx cantilever dugout (dugouts arriving in December!).

## 5. BARNHART CRANE GALVANIZED CHAIN LINK WITH SLATS

For this project at **Barnhart Crane**, we completed the installation of 1,047 linear feet of 6-foot tall, 9-gauge fencing with three rows of barbed wire, including a 36-foot bi-parting cantilever gate with automated operation. The beige slats added on the entire perimeter, ensured for optimal privacy while ensuring proper fence wind load.

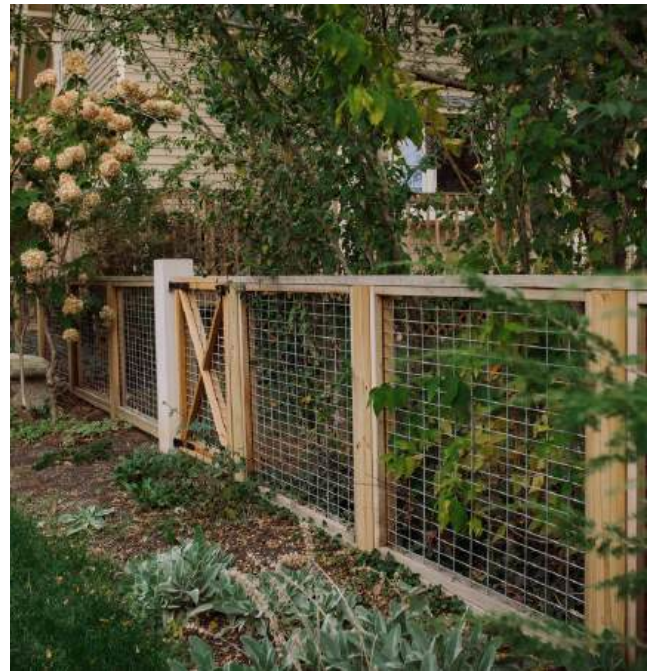

## 4. 30TH SOUTH YOUNG PARKING GARAGE

In collaboration with **Urban Five Construction**, we installed 150 linear feet of 12'-tall, 8-gauge black chain link fencing across three areas. This interior parking garage at 50 South Young Street included flange-plated posts and a custom install of chain link of various heights due to sloping concrete (7' difference in one run!). We relied on our trusty team and our EZG Fence Hog to get this material into position just right!

### 3. CLINTONVILLE CUSTOM WOOD FENCE

*This Clintonville project features a custom cedar and horse-panel fence built to complement the customer's limestone pillars, custom fabricated by **The Stone Center**. The smooth-milled cedar custom milled by our supplier partner **The Cellar Lumber Company**, created a level 4' profile with a stair-stepped bottom for the slope, and the gates were mounted using Cottage Hardware J-hooks epoxied into the limestone.*

### 2. LIBERTY MUTUAL - STATE AUTO BEE AVIARY

*For **Liberty Mutual Insurance's** recent Bee Aviary project, we completed 58 linear feet of 6-foot tall glass railing, with matte black powder-coated aluminum posts and welded steel surface-mounted stanchions. We sourced this special glass railing from Aqua View Fencing in Beverly Hills, CA for a special delivery on this amazing exhibit.*

### 1. COLUMBUS ZOO AND AQUARIUM - NORTH AMERICA TREK

*We partnered with Pepper Construction to help bring the Columbus Zoo and Aquarium's new North America Trek to life, installing over 3,500 linear feet of fencing in total. The project incorporated a wide and intricate range of materials, including log and cable, rail and wire mesh, round picket, post and rail, black chain link, black rectangular wire, and cedar privacy fencing.*

*What made this project so unique is that we constructed animal containment fencing and guest railing as well, making it a true test of our range in fencing.*

*This project was also our longest in scope to date—taking a total of 5 months to complete!*

*Unless otherwise noted, all images in this newsletter are courtesy of **Big House Photography**.*

## Let's Connect!

*Bowden Fence is dedicated to bringing your fencing dreams to life with exceptional craftsmanship and unparalleled customer service.*

*Celebrating 42 years of trusted service in Columbus Ohio, our family-owned business specializes in long-lasting, high-quality fences for commercial, industrial, and residential properties. Trust in our commitment to quality and durability, backed by a legacy of satisfied customers and a reputation for excellence.*
